Real Trump Token – RTTv2

October 2021

[www.realtrumptoken.com](http://www.realtrumptoken.com)

# **Mission Statement**

Our mission is to build a strong community of supporters from all backgrounds with one simple goal: to support a cause driven by the American people which directly improves their lives.

## **Overview**

Real Trump Token (RTTv2) is a utility token which operates on the Binance Smartchain (BNB Bep20) and has created an ecosystem in which the token plays a central role. The RTTv2 development team will be launching OpenCanvas, an NFT marketplace, in which holders of RTTv2 will receive benefits and promotions unavailable to those not holding the token. The team will also be releasing RTT News, an uncensored news website, in which you'll need to hold RTTv2 in order to gain access and contribute to the site. There are also future plans to use RTTv2 as a method of payment for bespoke and generic merchandise.

Ongoing development plans are underway to create a RTTv2 staking pool that allows holders of the token to receive rewards. Examples of future rewards could include tokens, NFTs, or merchandise.

# **Technical Stuff**

RTTv2 currently solely operates on the Binance Smartchain, however, the development team will be introducing an Ethereum (ETH) bridge accessible by an RTT Dex. This is due for release in November 2021.

The token had an initial supply of 10,000,000,000 (10 billion) when it was relaunched on 4 September 2021. Since that date, a total of 1,604,794,112 RTTv2 has been sent to a burn address meaning the circulating supply has reduced to 8,395,205,888 RTTv2. RTTv2 is presently available for trading on Bitmart, PancakeSwap, and FegEx. RTTv2 has also been listed on CoinGecko and CoinMarketCap.

A basic function of the token is that every transaction (buy/sell) has a 10 percent fee attached to it. There is an automated swap to liquify function within the smart contract which means that when a certain threshold is hit (2,000,000 RTTv2) an automated token swap to BNB takes place. This is then split into a number of wallets which can all be tracked within the blockchain.

# **Fee Breakdown**

## **2%**

- Two percent of every transaction on the blockchain is redistributed to holders of RTTv2.

## **2%**

- Two percent of every transaction on the blockchain is sent to the liquidity pool of RTTv2. These tokens remain in the form of RTTv2 until the automatic swap takes place, at which point half remain RTTv2 and half convert into BNB.

## **1%**

- One percent of every transaction on the blockchain is sent to a charity wallet as we 'Put America First'. This money will be used for charitable causes and is separate from any political agenda or affiliation. We aim to consult the RTTv2 community on the recipients of any charitable donation.

## **3%**

- Three percent of each blockchain transaction goes into our Patriot Wallet. We intend to contribute to causes the RTT development team feel passionate about with all profits made from the RTT Ecosystem. This will include monies raised through the Patriot Wallet.

## **2%**

- Two percent of every transaction on the blockchain will go towards marketing and the running costs of RTTv2.

Donald J.  
Trump**

# **RTT**

## **Ecosystem**

RTT's utility includes an NFT Marketplace called OpenCanvas (OC), which is currently in phase two of its development. Presently OC features one RTTv2 NFT collection, however, there will be more in the future. OC's link to RTTv2 means that royalties from the marketplace will be used to support RTTv2. 20 percent of each collection created by the development team will go towards buying and burning RTTv2 until a maximum BUSD amount of \$1,000,000 has been reached. OC will soon be able to support independent artists, host multiple NFT collections, and will allow people to create and trade their own NFTs. There will also be the added benefit to RTTv2 holders that they'll receive a window of up to 15 minutes where they will be the only people able to mint new collections on OC upon release.

RTT will soon host a news channel called RTT News. This will operate on the blockchain meaning it is immune to the censorship we all too often experience in everyday life. RTT News will only be accessible to those holding RTTv2. Holders will need to connect their wallet to the site to verify their holdings. People without RTTv2 in their wallet will not be able to actively contribute to the site.

The team has future plans to use RTTv2 as a currency for supporters to buy bespoke and generic merchandise through the RTT website. This idea which is currently in its early stages as the team waits for mass adoption before progressing further. However, the RTTv2 development team will implement a similar approach to royalties as they have with the OC marketplace.

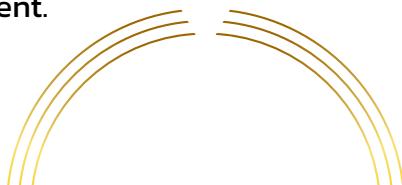

## **Charitable Contributions**

With one percent of each blockchain transaction going towards charitable causes, the RTTv2 team anticipates being able to donate money towards charity numerous times throughout the year. It is their intention that this money remains separate from any political agenda or affiliation. The RTTv2 team aims to consult the RTTv2 community on the recipients of any charitable donation. They will do this by selecting and vetting up to five charities. The community will have involvement in assisting making the decision on charitable donations, this will likely be achieved by holding a voting poll where anyone that holds RTTv2 will be able to cast their vote. In the event an individual or charitable group needs assistance, there will be an internal decision to take action, such decisions will be made by internal voting means.

## **Corporate Contributions**

The RTTv2 team will be making corporate contributions with any profits made from the RTT Ecosystem to the Make America Great Again, Again (MAGA, Again) PAC and other organizations or individuals that help progress the America First Movement.
